

FINEOS Claims for Disability Insurance resides on the open core, cloud-based FINEOS Platform, powered by AWS and delivered as a Software as a Service (SaaS) model.

## FINEOS Claims for Disability Insurance

# Experience the Power of Purpose-Built Claims Solutions

FINEOS Claims for Disability Insurance is a comprehensive software solution designed to enable carriers to easily navigate the complex and highly-regulated claims landscape of short- and long-term disability insurance for groups and individuals. Its integrated approach with FINEOS Absence, Policy, Payments and Provider, coupled with its AI-enriched technology platform, redefines the customer's claim experience while improving the bottom line.

### Increase Productivity

#### *Streamline Claims Intake and Workload Administration*

- Support your organization's unique claims servicing needs with automated workflows and AI-enhanced scripting.
- Accelerate service delivery with online coverage verification and eligibility as well as straight-through processing.
- Navigate seamlessly between short- and long-term disability claims.
- Ensure higher quality service with rule-based assignments, automated escalations, and faster approvals.
- Enhance communications with shared information, integrated scheduling, and fewer follow-ups to claimants, rehab centers, and service providers.
- Improve service delivery and ensure compliance with comprehensive access to current and prior claims history.

### Enhance Performance

#### *Improve Claims Outcomes and Increase Profitability*

- Inform and guide decisions, coordinate treatment options, and prevent fraud with online access to prior claims and provider cost history.
- Leverage AI-enriched analytics to improve the quality of treatment and reduce the length of time benefits are paid.
- Estimate costs and recovery times more accurately with MD Guidelines.
- Improve contract negotiation, reduce costs, and prevent fraud with easier access to claims and provider information.
- Manage claims expenses more accurately with more sophisticated tools to monitor provider costs and practice patterns as well as industry trends.

### Modernize Technology

#### *Configured for Maximum Flexibility*

- Out-of-the-box accelerators for deployment, including data migration tools, to reduce carrier setup requirements and ensure smooth integration with other systems.
- SaaS solution delivered either stand-alone or as part of a complete policy administration or end-to-end platform solution.
- Highly configurable, scalable platform to grow in line with business needs.
- APIs that matter to support transactions and customer interactions throughout the entire claims lifecycle.
- Trusted and compliant platform to support the most stringent security and regulatory requirements.

## Key Features

- Easy connection to self-service portals through APIs
- Robust search engine for real-time information sharing and collaboration
- Extreme flexibility in configuring claim structures, assignments, case management, follow-ups and payments (including multi-lingual and multicurrency)
- Complete claims and payment history with detailed calculations, explanations, back-dating, and audit trails
- AI-enhanced analytics and reporting for audits, performance management, fraud control, and payment accuracy
- User-configured triggers and heat maps for intuitive claims lifecycle management and faster identification of abnormalities

## Key Outcomes

### Increased Carrier Satisfaction

- Deepened customer and provider relationships through fewer requests for information, faster authorizations, and integrated payment processes.
- Improved patient outcomes from more effective coordination of care between case managers, service providers, and rehab centers.
- Increased market competitiveness from faster response to the changing needs of the claims organization.
- Improved ability to track and manage the transition between short- and long-term disability insurance claims.
- Faster, more accurate claims settlements with integrated authorizations and automated payments.

### Decreased Claims Expense

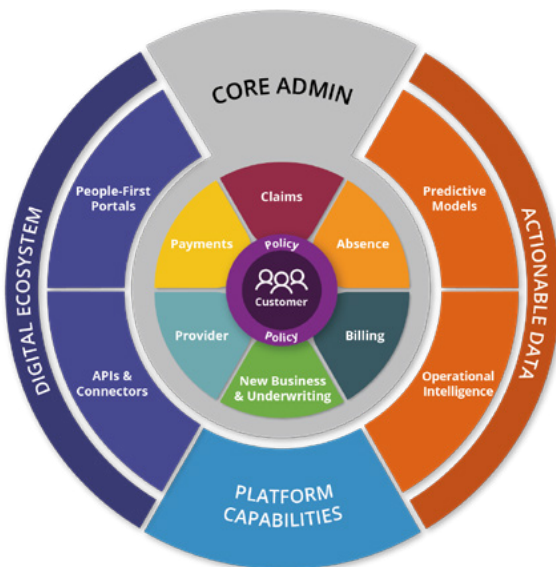

- Reduced potential for inaccurate payments, unnecessary or uncovered expenses, and fraud

through AI-enhanced analytics, faster escalation, and automation.

- Increased accuracy and less variability in claims payments from coordinated treatment plans.
- Increased accuracy in setting reserves.
- Improved ability to negotiate service provider contracts by having access to cross-functional information.

### Improved Operational Efficiency and Effectiveness

- Decreased service backlogs and bottlenecks from waiting on policy and coverage verification.
- Increased staff productivity from fewer claims service inquiries and requests for information.
- Streamlined compliance and audits through automated file assembly – available anytime.
- Redundant technology costs eliminated by leveraging a unified platform.

## The FINEOS Platform

FINEOS Claims for Disability Insurance is supported by the FINEOS Platform which is purpose-built for the Life, Accident and Health industry and the Employee Benefits market to seamlessly support insurers, employers, and employees on their insurance journeys. It is deployed as an end-to-end core solution or as components for incremental transformation on secure, scalable SaaS cloud technology.

### About FINEOS Corporation

FINEOS is a leading provider of core systems for life, accident and health insurers globally with 7 of the 10 largest employee benefits insurers in the U.S. as well as a 70% market share of group insurance in Australia. With employees and offices throughout the world, FINEOS continues to work with innovative, progressive insurers in North America, Europe, and Asia Pacific.
