

COURSE OUTLINE – (FTT-CI-006)

FINEOS CUSTOMISATION I - PORTAL INFRASTRUCTURE

About This Course

This course details the FINEOS web application framework, focusing on the jsp and widget model. Participants are guided through practical exercises in creating and enhancing the FINEOS portal pages.

Course Objectives

Attendees are given an overview of the FINEOS Portal Infrastructure. The jsp widget model is covered in detail, specifically portal pages, widgets and beans.

Who Should Attend?

Java developers involved in the technical development of the FINEOS Solution

Pre-requisites

Skills:

All attendees should be Java Developers with knowledge of J2EE

Participants of this course must have previously completed the following FINEOS training modules:

FTT-CI-005 – FINEOS Customisation I – Programming with FINEOS Business Objects

Summary of Course Contents

Module	Description
Portal Concepts	<ul style="list-style-type: none"> A high level introduction to the FINEOS Portal infrastructure.
Read only widgets, view pages & navigation	<ul style="list-style-type: none"> An introduction to coding widget classes (read-only) and widget jsp, Creating data beans, list views and tree views, Configuring and extending list views and tree views, Product Events and Listeners, Working with NavigableAction Events and Listeners
